Goals & Objectives

- Understand the comprehensive evaluation and management options in significant detail for many aspects of diabetic neuropathy and the foot at risk. This will include extensive detail on different treatment regimes
- Understand the management of osteomyelitis in the diabetic foot.
- Comprehend the use of invasive therapy for the comprehensive management of venous stasis ulcers.
- Understand classic and unique osteotomies and post op management for the fifth metatarsal.
- Review surgical and non-surgical approaches to medial column deformities.
- Review and understand “clinical pearls” to assist in the comprehensive management of disease and deformity of the foot.
- Update on current trends in practice from a medical legal stand point.
- Review of fads and non-traditional management from a more scientific approach.
